

PROTECTING THE PLANET

National Curriculum Objectives

- Use fieldwork to observe, measure, record and present the human and physical features in the local area
- Use a range of methods, including sketch maps, plans and graphs, and digital technologies.
- Interpret a range of sources of geographical information, including maps, diagrams, globes, aerial photographs and Geographical Information Systems (GIS)

Key Vocabulary				
recycling	aerial	photograph	environment	data
rubbish	plastic	marine	local	locality
eco friendly	sustainability	rainforest	field work	communication

Intents	Student
	● ● ●
I know where is classed as my local area, the features of it and can explain their significance	
I can undertake fieldwork to collect data over time and communicate and present this data in a variety of ways	
I can use the data collected to make a valued argument as to why we should protect our planet	
I can explain the meaning of sustainability and explore varying ways in which we can live sustainably.
